

TAG PLATE BEVEL PRO HS45

RANGE: 8 to 60mm Plate Thickness up to 45mm Bevel Width

Automatic milling machine, this machine process plate automatically with high efficiency; completely cold cutting, non-oxidation on the surface; for the milling cutter, the finish on the surface is satisfy with the requirement in welding industry; easily operate and non-pollution.

Can be used to process iron, chromium iron, fine-grained steel, aluminum products, copper and Aluminum alloy.

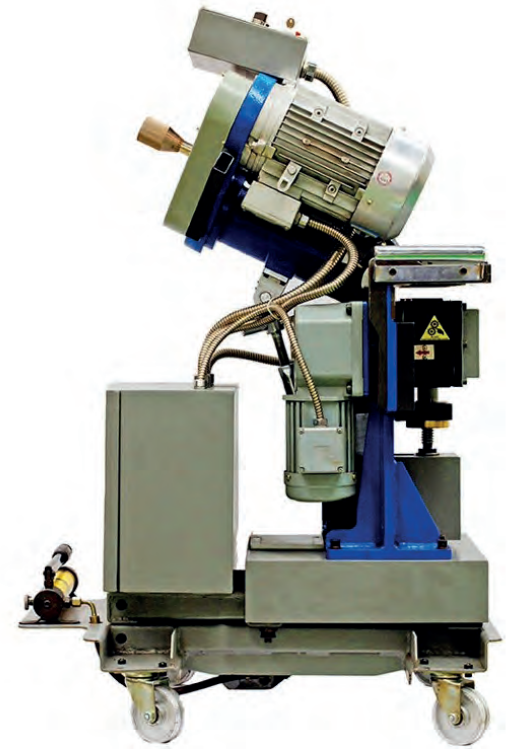

Can be processed into “K”, “V”, “X” or “Y” – shaped bevel.

Can be used in engineering machinery, steel structures, pressure vessels, shipbuilding, and the aerospace industry.

TECHNICAL SPECIFICATION

NAME	PLATE THICKNESS	FEED SPEED (mm/min)	MAX BEVEL (mm)	ANGLE
HS45	8mm - 60mm	0 - 1500	45	10° - 60°
Power Supply	AC 400V / 50HZ			
Feed Speed Control	0 - 1500 mm / min	0 - 1500 mm / min adjustable		
Bevel Angle				10° - 60°
Bevel Width			45	
Processing Plate Thickness	8mm - 60mm			
Total Power (Two Motors)	4800W (2 x 2400W)			
Adjustable Spindle Speed	600 - 1050 rpm			
Milling Depth	32mm			
Single Milling Width	first 19mm	second 30mm	third 45mm	
Min Plate Width	70mm			
Net Weight	300kg
